

THE AFFORDABLE PROTECTION FOR YOUR HOME

SAVE \$2,000 WITH OUR TANK-GUARD® PROGRAM

MOST HOMEOWNER'S INSURANCE DOES NOT COVER OIL TANK REPLACEMENT. OIL TANK REPLACEMENT COSTS CAN EXCEED \$2,000. TO PROTECT YOU FROM THIS UNPREDICTABLE EXPENSE WE RECOMMEND THE TANK-GUARD® OIL TANK PROTECTION PROGRAM.

TANK-GUARD® PROGRAM

If your tank qualifies, the proactive **TANK-GUARD Program** will help to protect it against internal corrosion and give you the **financial security of a tank warranty**. After you sign up for the program we will treat your tank with an effective liquid corrosion inhibitor to reduce the risk of tank failure. Then if your tank should leak due to internal corrosion while it is covered by the warranty, you will be eligible to receive a warranty credit of up to \$2,000 toward a replacement tank.*

- No one can predict how long an oil tank will last. Moisture builds up inside the tank, creating an acidic sludge that slowly eats away at the metal. **TANK-GUARD** can help to neutralize the corrosion activity.
- Oil heat industry experts recommend using a liquid corrosion inhibitor such as **TANK-GUARD**.
- **TANK-GUARD** is safe, effective and doesn't affect your furnace's performance or fuel efficiency.
- **TANK-GUARD** is added once a year during a normal oil delivery.

CALL TODAY TO SEE IF YOUR TANK QUALIFIES!

WITHOUT TANK-GUARD®
Untreated metal strip in fuel oil and water (rusting)

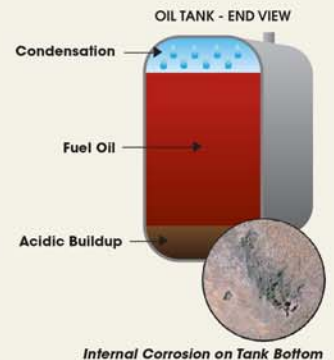

WITH TANK-GUARD®
Untreated metal strip in fuel oil and water and **TANK-GUARD®** (no rust)

HOW IT WORKS:

Water condenses from the air inside your oil tank and sinks through the oil to the bottom where acidic sludge develops. The sludge causes corrosive pitting that can occur anywhere on your tank bottom (see photo). **TANK-GUARD** reacts only with the acidic sludge, precisely where the problems occur.

*The TANK-GUARD oil tank warranty is provided by Lincoln Laboratory and is limited to the current terms of the "TANK-GUARD ANNUAL LIMITED WARRANTY."
